DESIGN

CONCEPTION

The Elegance range by CLS encapsulates all of the traditional wellness room requirements with an all important modern twist. Our design team work with you to identify all of your wellness needs and guide you through the process of planning your room design. We then produce a 3D full colour design that brings your ideas to life.

COMPLETION

COMPLETION

- Bench seating around the walls.

Other options available

- Cooling of the air down to 18°C.
- Individual seating.

The Uzume Wet Salt Room

(Uzume - Japanese goddess of The Dawn)

The Elegance Range incorporates the design and build of bespoke Wet Salt Rooms for both the domestic and commercial market; these feature rooms can be designed to any shape and size to maximise the space available.

This feature room is designed a constructed to the same specification as a Freyja steam room with all the luxury extras as well. The difference is that this room consists of heated seats and walls along with an automatic salt injection system, the salt is injected into the steam room on an adjustable timer system providing a pleasant ocean like atmosphere which helps to clear congestion, soothe the body and aid the respiratory system. The Uzume salt room provides the same healing therapy as the heavily visited Dead Sea which has proven qualities with regards to asthma and skin disease, the salt absorbs the fluid in the lungs and dries out the remaining mucus whilst also leaving your skin feeling fresh and rejuvenated.

The Aral Salt Room

Aral - Named after the Russian region famed for its Salt Lake.

The design and build of bespoke Dry Salt Chambers are incorporated in the Elegance Range for both the domestic and commercial market; these feature rooms can be designed to any shape or size to maximise the space available.

This feature room mirrors the climate conditions experienced in salt mines and caves with the walls and ceiling finished in crystalline pure salt. The purpose of the room is to provide Halotherapy, a medication free treatment used widely in eastern Europe for relief of such conditions as asthma, dermatitis and bronchitis. A fine spray of salt is pneumatically introduced into the chamber, generating a negative charge to the particles, further aiding relief from symptoms.

The Aral Salt Chamber consists of therapeutic fibre optic colour changing lights and a choice of aroma essences. The loungers are heated to a pre-determined temperature and to complete this relaxing experience music can also be introduced to the chamber.

The Minerva Mud Room

(Minerva - Greeks Goddess of poetry, medicine, and wisdom and the inventor of music)

- The Elegance Range Minerva Mud rooms are designed as pre book treatment suites.
- The Mud applications are very popular and there is a range of treatments available. The Muds extract toxins from the skin.
- The process is fully automatic and has to be tried to be believed.
 1. You enter a warm anti room and apply the mud
 2. You move into the pre warmed treatment room which has heated seats and stay until the mud bakes on you
 3. The steam generator fills the room with steam which softens the mud.
 4. The warm relaxing shower starts and the mud washes off.
 5. After this you move into the anti room and use the final shower to cleanse.
- Sequenced coloured mood lighting initiates the treatment sequences.
- The treatment sessions can be adjusted but this is often a 45 minute period.
- This feature room is constructed in the same specification as the Freyja steam room to a high standard with a choice of tiles.

The Sinann Foot Spa

(The River Goddess)

This feature is designed and constructed to be install on pool side or inside a wellness suite feature area. The seating is constructed to the same high specification as the Freyja Steam Room with the carefully designed curved front edge and sloping back rests to deliver the maximum comfort, the seats are available with internal heating systems if required. Each seat consists of two foot wells automatically filled, one with per-determined warm water the other with cold. Once the water has filled to the correct level the reflexology treatment commences with the warm waster gently bubbling and stimulating the reflex zones in the soles of the feet, then the warm bubbles will cease and cold treatment will begin. The length of each treatment is fully adjustable depending on the requirements of each individual installation.

Other options available:

The Sinann Foot Spa is fully automatic and can be operated by clients without any assistance from members of staff making it a must have item.

The Sequanna Feature Shower

(From Gallo - Roman religion, a Goddess associated with healing springs in Burgandy, France)

- The Elegance Sequanna shower is a snail shaped shower enabling privacy without shower curtains.
- The standard shower incorporates a number of shower heads including a large plate head and four directional shower heads.
- A large range of options for the mosaic tile finishes inside and out.
- This feature room is constructed in the same specification as the Freyja steam room to a high standard with a choice of tiles.

Other options available

- Power pumps for extra powerful spray with extra wall mounted shower jets.
